

ISF MEMBERSHIP

Benefits and exclusive features

WHO ARE WE?

The ISF is a leading authority on cyber, information security and risk management.

Founded in 1989, the Information Security Forum (ISF), is an independent, not-for-profit organisation that is driven and owned by its Members. The ISF is an international association of over 400 leading global organisations from a wide range of sectors including government, finance, manufacturing, pharmaceuticals and transport.

The ISF provides authoritative opinion and guidance on all aspects of cyber, information risk management and security. By harnessing our world-renowned expertise and the collective knowledge and experience of our Members, the ISF delivers practical solutions to overcome the wide-ranging security challenges impacting business information today.

WHAT ARE THE BENEFITS OF ISF MEMBERSHIP?

- Enterprise-wide business-driven solutions to a wide range of security issues, such as: the emerging threat landscape; advancing technologies; increasing economic, legal and regulatory pressures; greater focus on privacy and data protection and the need to be agile and competitive.
- A unique opportunity to exchange information, experience and solutions in an atmosphere of trust and confidence with key people in like-minded organisations.
- Regular networking with 'C-level' colleagues from leading organisations including regional and global meetings such as the ISF Annual World Congress which is fully funded for two delegates per Member organisation (excluding travel).
- A highly leveraged return on investment, eliminating much of the cost involved in developing in-house solutions independently.
- Being run by its Members, it provides the opportunity to influence the up-and-coming work programmes to help address the key challenges within your business.

Three core elements of ISF Membership:

RESEARCH AND REPORTS

ISF Members have unlimited access to an extensive library of reports that provide practical guidance and solutions to information risk challenges.

Our research and reports material incorporates an unmatched degree of thought leadership in cyber, information risk management and related topics.

TOOLS AND METHODS

The ISF offers Members a unique set of practical tools and methodologies to manage and control information risk throughout the enterprise.

Designed to be as straightforward to implement as possible, these offer Members an 'out of the box' approach for addressing a wide range of challenges – whether they be strategic, compliance-driven or process-related.

KNOWLEDGE EXCHANGE

The ISF brings Members together to share and discuss information security issues, experiences and practical solutions in an environment of total trust and confidentiality.

Our programme of workshops, meetings and forums are held across the world from Europe through the Americas to the Middle East, India, Africa, Australia and the Pacific Rim, and address both regional and international issues.

EXCLUSIVE FEATURES OF ISF MEMBERSHIP

Research, Tools and Methodologies

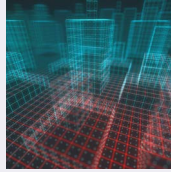

ISF Members have access to a wide range of research, integrated tools and methodologies including:

Standard of Good Practice for Information Security 2020

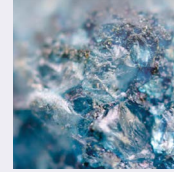

Information Risk Assessment Methodology 2 (IRAM2)

Benchmark: Assess and improve your security arrangements

Threat Horizon 2022: Digital and physical worlds collide

Protecting the Crown Jewels: How to protect your mission-critical information assets

Member Website

ISF Live is the ISF's secure Members-only website which provides Members with an easy way of participating electronically in the full range of ISF's activities and to communicate with their peers and ISF analysts in a private community.

Webcasts & Podcasts

An excellent opportunity to find out more about the key topics affecting the cyber and information security industry. Online webcasts cover research projects and training on our tools and methodologies.

Special Interest Groups

Address community-specific projects or challenges, with a particular focus in industries such as banking, finance, manufacturing, and government.

Regional Chapter Meetings

ISF Chapters are regional networking communities of ISF Members who hold one or two-day meetings, several times a year around the globe to explore regional topical issues and challenges in information security.

ISF Annual World Congress

The flagship of the ISF events calendar, attracting 1000+ business leaders, senior risk management and security executives from the world's largest and most security-minded organisations.

Consultancy Services

A cost-effective, full range of services delivered by qualified ISF Consultants with significant experience in the implementation of ISF research, tools and methodologies addressing issues relating to governance, risk and compliance.

Account Management

Each ISF Member is assigned an Account Manager to assist your organisation in gaining maximum value from your membership.
