

ISF Resilience

In a turbulent world, when your board asks if you're covered, what's your answer?

To respond with confidence, your organisation can retain ISF: a year of standing access to cyber security expertise, two rapid expert-led assessments, and preferred pricing across the full range of ISF access options. It is the fastest, most direct path into the ISF ecosystem without the commitment of full Membership.

Why now?

The cyber security landscape has shifted. Geopolitical instability, evolving regulatory requirements and rising board scrutiny mean security leaders need credible and immediate assurance. Organisations that act now can tell their leadership, their regulators, and their insurers something simple: we have retained ISF.

Retaining ISF at a glance

Duration

12 months from signing

Retaining ISF is active from the date of signing and runs for a full calendar year.

Standing relationship

Direct access to ISF expertise

A named ISF point of contact assigned from day one, backed by our Cyber Resilience Practice.

Core deliverables

Two expert-led assessments

- **Rapid Security Assessment**
- **Crisis Readiness Review**

Whether you deploy both assessments immediately or space them across the year to align with your operational calendar, the choice is yours. Retaining ISF keeps a live relationship in place, so when priorities shift, expert guidance is already on hand.

Developed and delivered by ISF Cyber Resilience Practice

Our people

The ISF Cyber Resilience Practice brings together consultants with multidisciplinary backgrounds spanning cyber security, physical security, critical infrastructure protection, and military service – combining perspectives that few advisory practices can offer.

Sectors we have worked in

- Retail
- Finance
- Logistics
- Government
- Critical National Infrastructure
- Nuclear Engineering

Practice specialisms

- Incident response planning
- Business continuity and disaster recovery
- Crown jewels analysis
- Critical security exposure
- Supply chain security
- Vulnerability assessment and compliance

Your two core deliverables

1 Rapid Security Assessment

An organisation-wide review of your current information and cyber security capability

What we do

- Two-hour expert-led workshop exploring each information security domain in depth
- Objective assessment of current capability and maturity level across the organisation
- Domain ratings aggregated and benchmarked against industry peers via ISF **Benchmark**
- Peer group quartile analysis showing performance relative to comparable organisations

What you receive

- Written report with findings, business implications, and prioritised recommendations
- **ISF Benchmark** comparison with domain ratings plotted against industry peer averages
- Measurable, actionable security baseline to present to leadership
- Expert guidance on interpreting results and identifying where to act first

2 Crisis readiness review

A structured review of your business continuity, disaster recovery and incident management capability

What we do

- In-depth review of your incident management process, BC and DR plans, assessed against ISF **SOGP**, NIST, and ISO best-practice frameworks
- Scenario coverage assessment across incident types and severities relevant to your organisation
- Alignment check against enterprise crisis plans, escalation thresholds and governance structures
- Stakeholder working sessions to stress-test clarity, completeness and decision-making

What you receive

- Written report with findings, improvement areas and a prioritised remediation roadmap
- Follow-up support session to assess effective implementation of key adjustments
- Executive and board briefing on findings – demonstrating resilience and return on security investment
- Confidence that your plans will hold under pressure, before an incident occurs

Further access at preferred rates

All below items are available to retainer clients at reduced rates, giving the flexibility to build on your assessments and access only the tools, research and community that matter most to your organisation.

ISF research resources

Access to full ISF research library, providing actionable insights and guidance from AI security governance to securing ICS environments.

ISF ISMS Framework

Access to the ISF **SOGP** framework in multiple formats, with cross-reference mappings to major global standards including NIST CSF and ISO 27002.

ISF Assure tooling

Practical tools to assess and manage security risk – covering information risk, supplier security, benchmarking and resilience road mapping.

ISF events and communities

Global access to **ISF Chapter** meetings across five continents, **ISF World Congress**, and the ISF Member directory and online communities.

ISF support

A dedicated account management, secure platform access, local hosting of Assure tooling data, and expert presentations or board briefings.

Ready for full access?

When the time is right, full access to ISF is the natural next step. Retaining ISF will position you to hit the ground running from day one.
